-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

The Examiner acknowledges this application as a continuation-in-part of the prior application 10/252,230, filed September 23, 2002.

Information Disclosure Statement

The information disclosure statement (IDS) filed 11/4/2003 is being considered by the examiner.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: 147b and 152. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "14" has been used to designate both a secondary hose assembly and a swaged ferrule. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement

drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 797911, Perry.

In regards to claim 1, Perry discloses a hose-in-hose comprising a longitudinally extended inner hose assembly including a first hose casing (6), a second hose casing (7), and a releasable inner coupler (8) for connecting the first and second hose casings; a longitudinally extended outer hose assembly enclosing the inner hose assembly, the outer hose assembly including a third hose casing (1), a fourth hose casing (3), and a releasable outer coupler (10, 11) for connecting the third and fourth hose casings; the outer coupler including opposing longitudinally shiftable sleeves (9, 12) associated with each the third and fourth hose casings; each of the sleeves threadably shiftable relative

to its respective associated hose casing between an extended position and a retracted position; the sleeves being connectable in their the extended positions; the sleeves being separated in their the retracted positions to expose the inner coupler.

In regards to claim 3, Perry discloses the sleeves being secured together in the extended position with a fastener (11).

Allowable Subject Matter

Claims 2 and 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-11 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose a hose-in-hose wherein the outer coupler has a tubular shank connected to each of the third and fourth casing, and one of the shanks is threadedly engaged with one of the sleeve; nor, the outer coupler having longitudinally shiftable collars threadedly engaged with the third and fourth sleeves.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it illustrates the inventive concept of the invention.
